Subject:	ITT1-2 (Responsive Webpage Design and Development)
Topics Covered:	Working with Contents and Layouts
Intended Learning Outcome:	At this project, students should be able to: — *Identify the different types of Bootstrap 4 components used to provide content of webpages.* — *Apply utility classes to create customize styles and formats typographic elements.* — *Build a simple responsive webpage using BS grid system.* — *Design flexible-look webpage contents involving additional useful classes in Bootstrap.*

MIDTERM LAB PROJECT

Build a sample resume web page using Bootstrap. Apply what you have learned from Module 1 to 5. For color styles, padding, margins, and border, you can use the utility or helper classes available.

The wireframe of the webpage is shown in Page 2.

For a better and clearer resolution of the sample output, you can view or check a sample image here:

https://go.nvsu.edu.ph/bAcsZ

NOTE: Use sample pictures on your webpage (figures with X in the sample output). You can download free images here: https://www.freepik.com/ . You can also make custom CSS if needed.
